

## Global Central Lab Services: Global Logistics | Customized Visit Kits | Sample Storage | Project Management | Data Management

### CENTRAL LAB SERVICES

SGS Analytics is your global central lab providing analytical as well as clinical trial services for the pharmaceutical and biotechnology industries with extensive experience of 25+ years and more than 3,000 clinical studies and projects.

### WHAT WE DO?

SGS Analytics provides customized, easy-to-use blood sampling kits to the clinical study sites. Our solution-minded and responsive project management teams oversee expiry of materials provided as well as the global sample logistics at ambient, cooled or frozen condition. Our specialized labs offer a broad analytical portfolio, from safety analysis, biomarkers to PK, PD, immunogenicity and GMP testing, all in high quality

standards. Moreover enough capacity at our central lab for long term storage of study samples is available. Last but not least highly customized lab reports and data transfers result in further advantages, as easy uploads to eCRFs.

### WHAT MAKES US EXCEPTIONAL?

We are experienced, flexible and responsive, providing our services with high quality standards.

Your Investigator sites will benefit from easy-to-use blood sampling kits and instructions.

Our highly dedicated and solution-minded project management teams are your key for your successful clinical trial!

## EXPERTISE

### STUDY SERVICES

- Customized, visit-specific kit building
- Study- and site-specific lab manuals
- Supply of kits and ancillary material to sites including expiry tracking
- Worldwide sample logistics at ambient, cooled and frozen temperature
- Extended sample storage at ambient temperature, 2-8°C, -20°C, -80°C or liquid nitrogen
- Global study data base, identical lab reports world-wide
- Customized lab reports and data transfers
- Committed and experienced project and data management, providing local support and global oversight
- Secure online access for Sponsor/CRO to get study insights

### CUSTOMIZED ANALYTICAL SERVICES

- Assay development
- Method validation according EMA/FDA
- PBMC / BMMC cell isolation
- Biomarkers screening and development

### ANALYTICAL SERVICES

- 24/7 lab service for early phase trials
- Safety analysis (hematology, biochemistry, serology, ...)
- Advanced analytical spectrum (advanced coagulation panel, large allergy panel, immunological analysis, PK, PD, Immunogenicity, Biomarkers)
- Genetics and PCR
- Histopathology and cytology
- Experience with various matrices (serum, plasma, biopsy, CSF, ascites, amniotic fluid, ...)

### QUALITY ASSURANCE

- GCLP/GCP compliant
- Independent QA department
- Periodic audits from customers as well as inspections by the relevant local agencies
- 21 CFR Part 11 compliant study database
- Rigorous cross-validation ensures comparability of global lab results
