

Verification of Greenhouse Gas Balances and Reports

PRODUCT DATA SHEET

If you already collect data on energy consumption and greenhouse gas emissions and create company-wide or product-related greenhouse gas balances, we can verify them. With our internationally recognized verification statements, you receive a powerful tool for your external communication.

If your company already collects data on energy consumption and greenhouse gas emissions and calculates company-wide corporate carbon footprints (CCFs) or product carbon footprints (PCFs), SGS is the right partner for you when it comes to verification.

AVOIDING GREENWASHING

Our experts verify your calculations and make sure that the quality is right.

An independent review is crucial to increase the credibility of your balance sheets and avoid suspicions of greenwashing

Misrepresentation could affect your company's reputation and possibly even your position in the financial market.

OUR SERVICES

CCF VERIFICATION

Verification of data and calculation of your Corporate Carbon Footprint (CCF) according to ISO 14064-1 or GHG Protocol according to the requirements of ISO 14064-3

PCF VERIFICATION

Verification of data and calculation of their Product Carbon Footprint (PCF) based on on-site audits

SUPPORT

Verification of your data and calculation methodology for products, services or your entire company on the way to climate neutrality according to PAS 2060

CONTACT

We look forward to supporting you in achieving your goals.
